

## PCS-1 Pill Counter (Beta)

TORBAL is proud to introduce our first fully automated tablet and pill counter. The PCS-1 combines state-of-art mechanics with innovative photo-optics to provide you with the ultimate pill counting experience. When counting with the PCS-1 you do not have to worry about cross-contamination and frequent cleaning of the unit. After you key in the number of pills you wish to count the PCS-1 extracts the selected amount of pills directly from the supply bottle, straight into the prescription vial. Pills never come in contact with any mechanical parts of the unit. Counting with the TORBAL PCS-1 is hand free, fast safe and accurate.

---

PCS-1 Concept Pill Counter is a manual pill counter, which is used to count and dispense pills. It is a simple, easy-to-use device that can be used by anyone. The device is made of plastic and has a white finish. It has a small LCD display and several buttons. The device is used by placing the pills in the counter and pressing the buttons to count and dispense them. The device is very accurate and can count up to 999 pills. It is a very useful device for anyone who needs to count and dispense pills.
